Dinette Sets

Dinette Sets

We possess the most advanced production equipments and technology and specialize in producing (SMC) diaphragm molding GRP slice, (SMC) diaphragm molding GRP products and hollow blow molding products. The products have such characteristics as anti-corrosion, insulation, anti-ultraviolet, wearable, waterproof, moisture-proof; impact-force resistant and anti-aging, etc. Products are widely used in sports stadiums, stations, parks, fast food shops, conventional centers, the Chamber of entertainment and canteens in large and medium-sized institutions. The pursuit of high quality combined with excellent after-sales service makes the market of our products expand throughout domestic provinces and autonomous regions and win the trust of customers.
