## Swing Carousel

### Swing Carousel

#### Standard Features:

Hot-dip galvanized steel rotary structure (with exception of the central column); hand painted decorative fiberglass with scenes of Venice (as on Bertazzon carousels) in 18th century styling with lighting; central rotary structure with 3 meters (10 feet) lift from central pole (on 11 meter version); AC self-braking motors controlled by static frequency converter; stainless steel chairs suspended by stainless steel chains.
