Boat-Tender

Water Bike and Hydro Bike are the ultimate manpowered water transports. The Water Bike is designed for full aerobic exercise. The Sea Cycle can carry one to four riders. The Hydro Bike is available in a Single or Dual Rider Model. Having fun, exercise, cruise, fishing or using as a boat tender all happen in one day. Water Bike & Hydro Bike both use pedal driven propellers to power the catamaran style boat. The Sea Cycle uses a hand controlled rudder for steering. The Water Bike uses handsfree body control to steer while the Hydro Bike applies handlebars.
