

Water Playground Equipment

Water Play-Water Gun

Water Play-Water Gun

It is an improved brand new water gun.

Features:

1. Splendid Color: It offers tourists with more diversified vision experience, increases the flexibility of coordinating with surrounding environment and facilitates the building of the overall atmosphere of the park.
2. All-dimensional activity angle: it can spin 360°horizontally and be adjusted $\pm 30^\circ$ vertically. Nearly all-dimensional spray angle can offer tourists different and refreshing entertainment stimulation.
3. Super Tourist Participation: The former water cannons are not of fixed spray. They are simply start and stop, whose moveable angles are limited to the horizontal direction. Thus, tourists are not greatly involved and the equipment turns out to be a decoration. However, the new type water gun adopts self-suction technology, which emphasizes the individual impact and demands stronger skills. It can generate different effects at different operation levels.
